These tests were done in an era where people were crazy and did tests on humans.

Deontology today has forbidden a study like this so we had to use data we found from another era.
We must not question the methodology, everything which is science is good.

Hopefully, you understand the sarcasm. It's important to have science but it must not be stronger than ethics, morality or even worse, the law.

It is important tho, that not many children sleep in a small room. It could be dangerous. This is real regardless.

THE DATA IS FAKE SUPER FAKE. HOPEFULLY AFTER THIS YOU WILL WONDER... What Ethics, Morality and the Law are?
